

**THE JANE WEST GLASSWARE COLLECTION**

Available in Cobalt, Cloud, and Mint

Designed in collaboration with scientific glass producer Grav Labs, the Jane West Collection by GRAV is the company's debut line of original cannabis home goods. The collection features five elegant and functional contemporary takes on classic glass pipe designs in cool mint, serene cloud and striking cobalt blue.

Each borosilicate glass piece is made with the purest silica in the world, and pure cobalt ore imparts the collection's distinctive deep blue hue. Designed with the mainstream cannabis consumer in mind, the Jane West Collection by GRAV presents glass pipes as functional design objects of the highest quality, to be displayed at home and shared with friends.
